

Improving Sexual Wellness

Research & Development of Medical Treatment,
Therapy and Education of Sexuality

ABOUT TENGA HEALTHCARE

In the Summer of 2016, our parent company TENGA celebrated its 11th year in business. To further advance the company's agenda on improving sexual wellness, TENGA Healthcare Inc. was established in Autumn of 2016. At TENGA Healthcare Inc. we wish to improve the sexual wellness of all people, through the knowledge and experience we have gained throughout the years. In cooperation with committees in sexual medicine, therapy and education, we aim to resolve and encourage prevention of problems related to sexual wellness that these organizations were unable to overcome on their own.

VISION

A World With No Sexual Troubles.

Operation of Clinics Sex Ed.

Support and dissemination of information regarding sex education and public hygiene.

Research

Conducting and supporting research that will benefit human sexual wellness.

MESSAGE FROM OUR PRESIDENT

Resolving the Troubles related to Sex & Sexuality

We established TENGA Healthcare Inc. as a company that can assist in building the foundations for being able to enjoy sexuality. Our parent company TENGA Co., Ltd. was founded on the concept of making sexuality something everyone can enjoy, supporting the enjoyment of sexuality for the last 11 years. However, for people with fundamental problems and worries regarding sex and sexuality, the main focus is not the "enjoy" sexuality yet, but rather to build a foundation to first begin to enjoy sexuality, through treatment of a problem or from rehabilitation or recovery from an ailment or worry. This was the main concept I had in mind after becoming 30 and myself facing problems in my sex life, such as ejaculatory dysfunction, that I had not faced before.

For example, premature ejaculation and ejaculatory dysfunction are two very common sexual dysfunctions faced by men, but the number of people actually visiting doctors to receive treatment or rehabilitation is far lower than the number of cases. This is the reality of sex, sexuality, sexual medicine and dysfunction. TENGA Healthcare Inc. aims to resolve and encourage prevention of many of these problems that many people don't, or don't know where to turn to for help, with leaders in the field of sexual medicine and research. That is, not in the unreliable or uncertain methods until now, but with real scientific evidence-based methods. We vow to support people to attain or regain the ability to enjoy their sexuality, through "Sexual Self-Care" based on factual, correct information.

President Masanobu Sato
